Instructions: after printing out this envelope on cardstock-weight paper, cut out around the outer lines. Fold the dividing line between the front and back of the envelope, so that the printed side is on the outside. Fold under the two marked flaps. Apply adhesive to the two marked flaps (on the side of the flap containing the instructions), then close Side B over them, pressing down until a good, solid seal is achieved. Allow the glue on the envelope to dry for an hour or two before tucking the cards inside. Fold down the flap at the top of Side B, then tuck into the envelope to secure the cards inside.
